

Jianhong Zhao

Applied AI / LLM Evaluation Candidate

Beijing, China | +86 182 3720 2661 | zhaojianhong0033@163.com

SUMMARY

Master's student in Journalism and Communication with hands-on experience in AI video evaluation, AIGC workflows, AI product operations, and developer community growth. Strong at translating content quality, user feedback, and multimodal evaluation problems into structured criteria, SOPs, and practical product insights. Actively learning Python and LLM application workflows, with strong interest in AI agents, tool use, workflow orchestration, and applied AI systems.

CORE SKILLS

AI / LLM: Prompt engineering, LLM tool use, AI evaluation, benchmark thinking	Programming: Python beginner; learning API-based AI workflows
Multimodal: Video captioning, cinematography, aesthetics, emotion and narrative analysis	Product: SOP design, user feedback, quality review, workflow optimization
Operations: Developer growth, community engagement, data monitoring	Languages: Chinese native; English professional working proficiency

EXPERIENCE

Tencent Yuanque - AI Video EvaluationApr 2026 - Present

Video Aesthetics Evaluation / Caption Annotation Intern

- Evaluate AI-generated and professional video clips across cinematography, aesthetics, color, motion, scene design, character action, emotion, and narrative logic.
- Write accurate and expressive captions that convert visual quality, story information, and emotional atmosphere into structured text for evaluation use cases.
- Study benchmark-related scoring rules and quality review workflows; summarize typical ambiguity cases and process issues in annotation and review.
- Developed product-level understanding of how subjective video quality can be transformed into evaluation dimensions, review criteria, and case libraries.

Beijing Academy of Artificial IntelligenceJan 2026 - Mar 2026

Open Source Operations Intern

- Supported developer outreach and community operations for FlagOS-related open-source initiatives and offline AI industry activities.
- Helped execute growth campaigns that reached 804 developers, contributed to 137 GitHub Stars growth, and generated 3,942 Git Clone actions.
- Tracked community and product engagement metrics to support operation decisions and developer feedback loops.

Hangzhou Hangxingyue Culture MediaMar 2025 - May 2025

AI Product Operations Intern

- Created 60+ standardized tutorials covering AI script generation, digital-human presentation, editing, and publishing workflows.
- Supported B2B merchant onboarding and sales enablement by turning complex AI tool usage into repeatable SOPs.
- Collected practical user pain points from delivery and training scenarios and translated them into product experience feedback.

AIGC Short Film Project - Home Is Not Far AwayProject

Core Visual Team Member

- Worked on a 10-minute realistic AIGC narrative short film adapted from a true story, focusing on image-to-video generation and visual consistency.
- Addressed practical generation issues such as flickering, character deformation, scene continuity, and multi-scene style control.

EDUCATION

Minzu University of ChinaExpected Jun 2028

M.A. in Journalism and Communication

Relevant focus: media production, visual storytelling, qualitative research, AI content production, and multimodal content evaluation.

SELECTED KEYWORDS

AI Evaluation, LLM Workflows, AI Agents, Tool Use, AIGC Video, Multimodal Content Analysis, Video Captioning, Benchmark, Quality Review, Prompt Engineering, Developer Growth, SOP Design.
